

MONTHLY SERVICE REPORT - AUGUST 2026

Client: Acme Corp

Prepared by: TechConsult d.o.o.

1. Summary

System availability for August 2026 was 99.94%, above the 99.9% SLA target. Two minor incidents were recorded, both resolved within the agreed response time. No data loss occurred.

2. Incident log

INC-1042	2026-08-07	Elevated API latency (p95 1.8s) for 22 minutes. Cause: undersized connection pool. Fixed by raising pool size and adding an alert.
INC-1043	2026-08-21	Background job queue backlog of 3,400 messages. Cause: a poison message. Fixed by adding a dead-letter queue.

3. Capacity and cost

Average CPU utilisation: 41%. Peak: 76% on 2026-08-19.

Storage used: 812 GB of 1,000 GB provisioned.

Estimated infrastructure cost for August: EUR 180.50.

4. Recommendations

a. Upgrade the primary database instance before Q4 traffic growth.

b. Introduce autoscaling for the worker tier.

c. Schedule a disaster-recovery drill in September 2026.

5. Next review

The next service review meeting is scheduled for 2026-09-05.
